CONTROLLED INFORMATION

Document control and use

A company profile explaining Redhill's origin, legal identity, regional position, affiliated manufacturing network, product scope, quality coordination, and export role.

Document record

Field	Controlled value
Document ID	RH-CP-2026-EN-V1.0
Version / release	1.0 / 2026-09-03
Owner	Redhill (Chifeng) Cross-Border E-Commerce Co., Ltd.
Language	Global English
Review cycle	Review after material product, regulatory, process, or company-information change

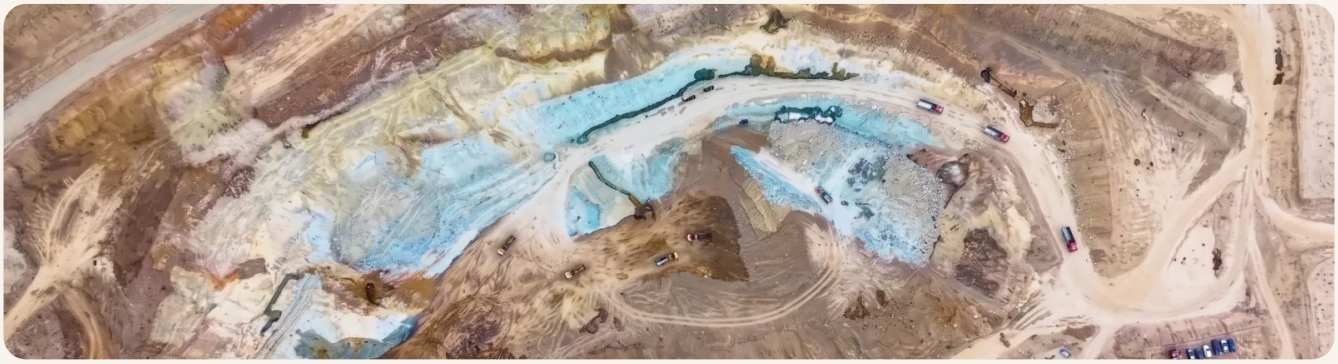

Use conditions

- This resource supports buyer evaluation and project scoping; it is not a binding product specification, certificate, quotation, or legal opinion.
- Final manufacturer, site, formula, method, limit, packaging, quantity, claim, document set, price, and trade term must be confirmed in approved transaction documents.
- Destination-market classification, labelling, customs, chemical, environmental, and disposal requirements remain subject to importer and professional review.

NAME AND PLACE

Why Redhill

Redhill is named for Chifeng in Inner Mongolia. In Chinese, Chifeng means 'red peak' or 'red mountain', connecting the company name to its home region.

Company identity

Redhill (Chifeng) Cross-Border E-Commerce Co., Ltd. was established in September 2025 to focus on international business for cat litter supply programs originating from the regional production cluster.

Brand direction

Redhill aims to build a recognisable origin-based B2B brand while keeping the legal manufacturer, production site, product evidence, and transaction roles transparent for each order.

Regional context

The Chifeng-Chaoyang area combines bentonite resources, cat litter processing, plant-based production, packaging supply, warehousing, and access to northern China export routes.

TRANSPARENT SUPPLY COORDINATION

Business role and relationship model

Redhill is a specialist trading and export-coordination company associated with several legally separate cat litter manufacturers.

Redhill coordinates

- International sales and buyer communication
- Product and assigned-site sourcing
- OEM and private-label development
- Quotation and commercial coordination
- Quality-document alignment
- Export logistics and transaction documents

Affiliated manufacturers provide

- Production equipment and personnel
- Formula/process execution
- Batch and inspection records
- Packaging and loading support
- Manufacturer-specific certificates and evidence

Order-level transparency

The proposed legal manufacturer, production site, product, formula/specification, evidence, and transaction structure are confirmed for the project.

PRODUCT SPECIALISATION

Affiliated manufacturing network

The network supports complementary mineral, tofu, cassava, and mixed cat litter programs. Actual capacity and scheduling are confirmed against the assigned site and order requirements.

Network planning

Program	Manufacturing focus	Project confirmation
Bentonite	Ball and crushed mineral litter	Source, mineral definition, processing, line, capacity
Tofu	Soy-fiber pellets and blends	Formula, inputs, pellet line, moisture control
Cassava	Cassava/tapioca formulas and blends	Formula, binder system, line, packaging
Mixed	Plant-mineral and all-plant variants	Ratio, additives, assigned process, claims evidence

Capacity language

Redhill does not publish one combined capacity figure as if all sites were one factory. Order capacity is confirmed by product, manufacturer, line, packaging, and schedule.

SIX CORE PROGRAMS

Product portfolio

The portfolio covers mineral, plant-based, plant-mineral, and all-plant options for distributors, retailers, e-commerce sellers, and private-label buyers.

Mineral

- Clumping bentonite - ball granules
- Clumping bentonite - crushed granules

Plant-based

- Tofu cat litter
- Cassava cat litter

Mixed

- Plant and mineral mixed cat litter
- All-plant mixed cat litter

Customisation

Formula, particle size, fragrance, functional additives, packaging, artwork, and documentation can be scoped subject to feasibility, evidence, and market review.

EVIDENCE BEFORE CLAIMS

Quality and laboratory coordination

Quality work starts with an approved sample and specification, then links incoming materials, batch records, finished-product checks, packaging, loading, and retained evidence.

Common checks

- Appearance and particle distribution
- Moisture and bulk density
- Dust, absorption, and clumping by agreed method
- Packaging and net content
- Label and barcode
- Container and loading

Laboratory role

Testing capability and equipment belong to the relevant manufacturer or contracted laboratory. The method, issuer, batch, units, limits, and report scope are confirmed for each project.

Third-party support

SGS, Bureau Veritas, Intertek, or another agreed inspector may be arranged when requested and commercially confirmed. No third-party endorsement is implied by naming service providers.

BUYER EXECUTION

OEM, packaging, and export support

Redhill helps buyers translate a market brief into an approved product, packaging system, commercial offer, and shipment file.

OEM stages

- Brief and benchmark
- Formula/sample
- Packaging/artwork
- Quotation/PI
- Production and inspection
- Shipment and after-sales traceability

Trade support

- EXW/FOB/CIF or other agreed term
- Packing and loading planning
- Commercial and transport documents
- Origin and other evidence when applicable

Packaging

- Retail pouches and brick packs
- Spouted refill pouch
- Jugs and pails
- Wholesale sacks
- FIBC bulk
- Corrugated multipack shipper

CONTACT AND NEXT STEPS

Start a buyer project

A complete brief allows Redhill to recommend the right product program, assigned manufacturer, packaging route, evidence plan, and quotation basis.

Send

- Target country and channel
- Product or benchmark
- Required performance and claims
- Pack format and net content
- Trial and repeat quantity
- Destination and Incoterm
- Required tests/documents
- Target launch timing

Response

Redhill will identify missing inputs, propose a product and site direction, and prepare a controlled sample/quotation path. Final terms are issued only in approved transaction documents.
